

### **Printers available:**

lp1	Top Floor, Network Room
lp2	Bottom Floor, Network Room
lp4	Bottom Floor, Network Room

### **Recommended commands to be used for printing:**

#### ***\* Default mode - duplex printing, long side binding***

```
$ ppr -d <printer name> <file name>
```

#### ***\* forced duplex, long side binding***

```
$ ppr -d <printer name> --feature Duplex=DuplexNoTumble  
<file name>
```

#### ***\* Forced duplex, short side binding***

```
$ ppr -d <printer name> --feature Duplex=DuplexTumble <file  
name>
```

#### ***\* Forced simplex (single side printing)***

```
$ ppr -d <printer name> -- feature Duplex=None <file name>
```

#### ***\* Viewing the printer queue***

```
$ ppop list <printer name>
```

#### ***\* Cancelling submitted job***

```
$ ppop cancel <job_ID from ppop list>
```

Note: The printers are set to print in Duplex mode by default. Hence these of the old lpr command is discouraged. It is also recommended that you specify the printing option explicitly.
